

Addressable Call Point

For Apollo Protocol Analogue Addressable Control Panels

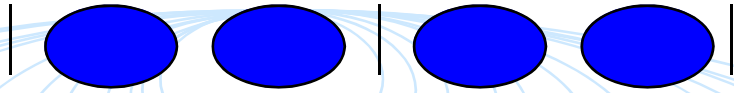

Key Features

- ◆ Ideal for use with all Control Equipment's Apollo protocol analogue addressable control panels
- ◆ The highest quality of design, componentry and manufacture for outstanding durability
- ◆ Printed circuit board encased within the call point for installer convenience and easy field termination connections
- ◆ Uses the latest manufacturing technology to ensure consistency and reliability of product supply
- ◆ Available with or without back-box to suit site requirements
- ◆ Alternative glass options available (dependent upon quantities)
- ◆ Generally available from stock
- ◆ Weatherproof option available
- ◆ Competitively priced

From the UK's leading control panel manufacturer

Introduction

The Control Equipment Ltd addressable call point is ideally suited for all standard applications where CEL analogue addressable panels are used (Apollo S90, XP95 or Discovery protocols). The surface mount printed circuit board technology produces a very neat, compact design giving ample access and saving valuable on-site installation time for the installer. The optional back-box allows the end client to determine whether a surface or recessed unit is most appropriate.

In addition, the application of the most stringent production and assembly standards and the very latest in surface mount technology ensure a consistently high level of product quality and reliability.

Technical Specifications

Device:	KAC KR62 Call Point, fitted with M130 cradle
Addressing:	1 to 126 using DIL switches
Electrical Specification:	Loop voltage: 17-28V DC Quiescent current: 1.2mA @24V DC Maximum current: 3.3mA @24V DC with LED operated
Terminals:	Loop +/-: Flying lead connection to back-box
Weatherproof Option:	IP65 rated

Part Numbers

2500/235	CEL Addressable call point without back-box
2501/240	Back-box for CEL Addressable call point
2500/245	CEL Addressable call point c/w back-box
2500/243	Weatherproof CEL Addressable call point
