

System X

Hardwired into the fire alarm panel, System X communicates with all linked devices.

System X features

- Hardwired into the fire alarm panel or loop
- Utilises Wi-Fi technology
- 1000m site specific range
- Fully fail-to-safe with battery back-up
- Complies with BS EN 1155 and BS 7273-4 category A
- Communicates via radio to all linked devices

Dorgard X

Dorgard X allows you to keep your fire doors open safely and legally. In the event of the fire alarm sounding, Dorgard X receives a radio signal from hardwired System X and releases the fire doors, preventing the spread of fire and smoke.

Deafgard X

Deaf and hard of hearing people are in danger of not hearing your fire alarm. Deafgard X is a moveable device that upon the fire alarm sounding receives a radio signal from hardwired System X. The under pillow-pad vibrates to wake the sleeper and flashing LEDs and LCDs provide visual indication that the fire alarm is sounding.

eXitfinder

Fire Exits can be hard to find in a fire situation, eXitfinder is a wall mounted sign that will illuminate and flash upon receiving a radio signal that the fire alarm is sounding from hardwired System X.
